

# Benvenuti! / Bienvenue! / Welcome!

## A JOURNEY INTO WONDER

### The new Borgo San Dalmazzo railway station

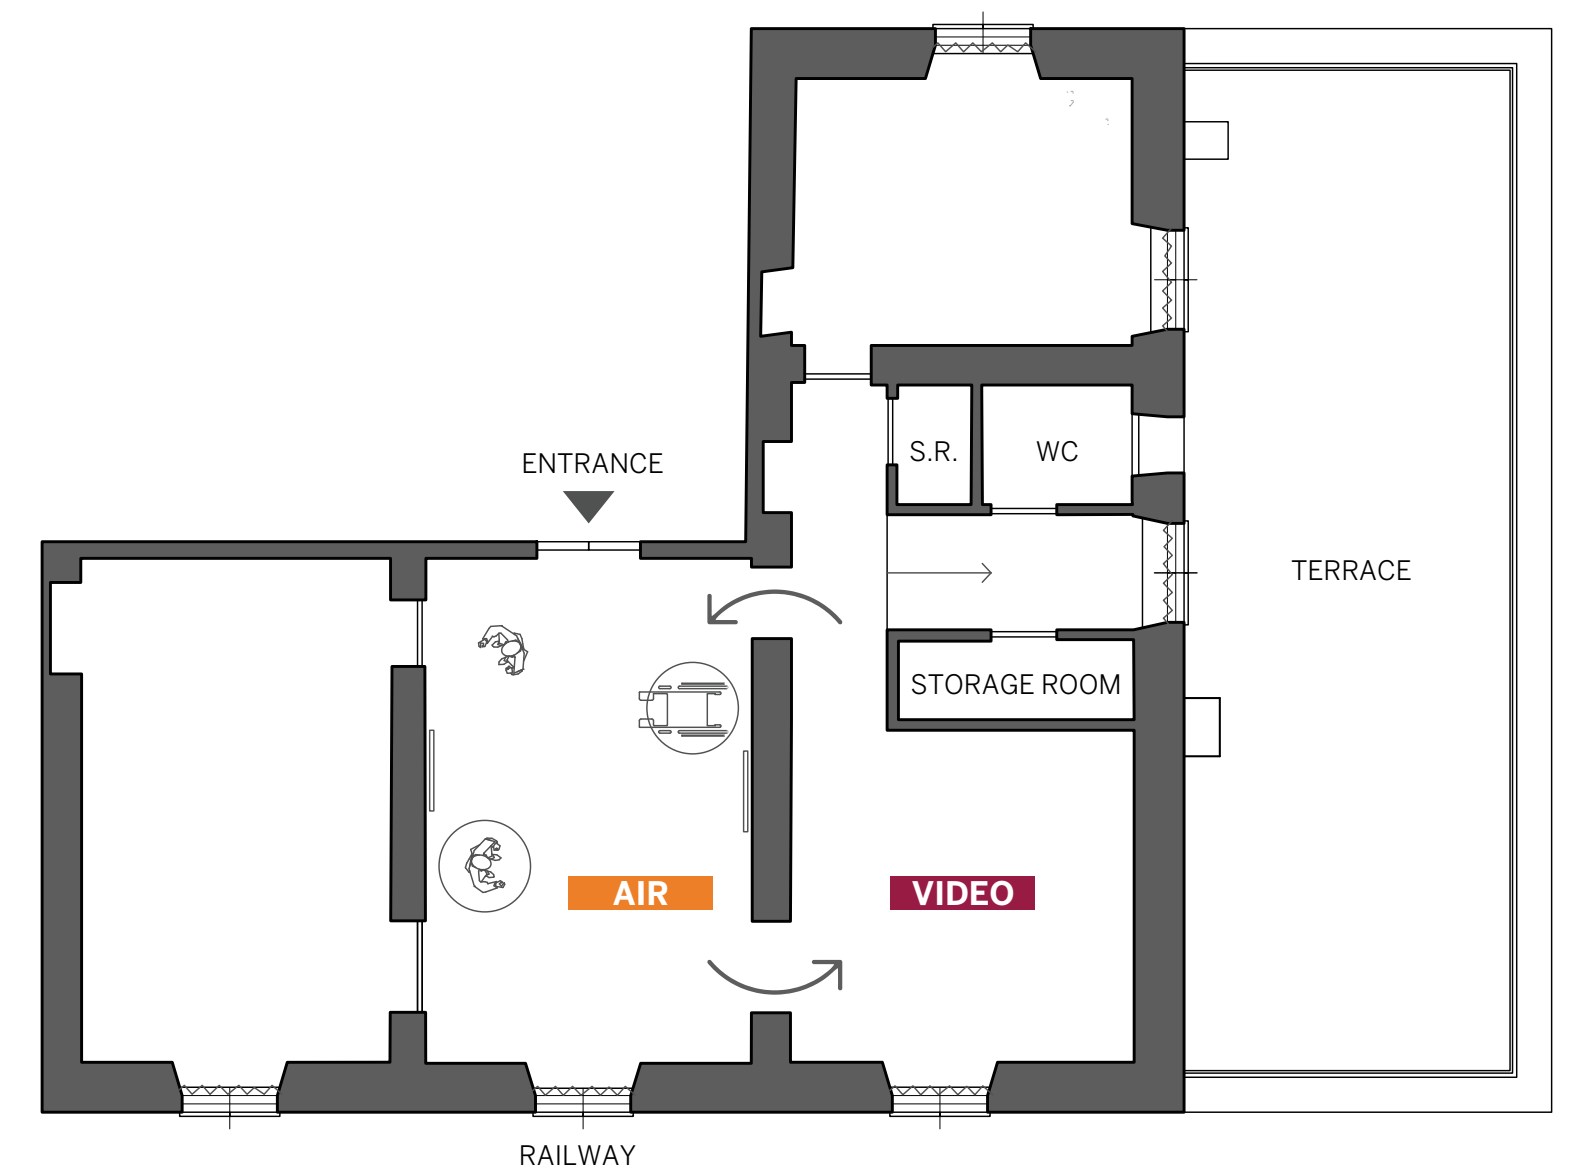

In these halls an interactive, immersive and entertaining experience will give you the opportunity to explore and get to know the area that stretches from Borgo San Dalmazzo towards the French border, throughout the Vermenagna, Gesso and Stura valleys.

There are two halls: the **Air Hall**, where you can play with paragliding flight simulators and virtual reality, and the **Video Hall**, where you can immerse yourself into some of the places explored during the game, but that is not all.

New simulators and games will be added to explore our valleys, including the Roya one, in a fun way.

To get started, please look at the game instructions on the side of the monitors.

Don't forget to download the information via QR-Codes to further explore this territory.

### CONSTRUCTION WORKS

Technical and economic feasibility project:	Arch. Alberto Bottero
Executive design and Operations Management:	Studio BDR Bureau Architetti Associati
