

# INSTRUCTIONS

## In Flight!

### BEFORE YOU BEGIN

Sit in your chair calmly and take care not to stumble.

Put on your visor. Do you wear glasses? Fit the front straps first and then the back ones.

Grip the handles.

- **STEP 1 > SETTING** > Set your balance position: lower both handles until the system gives you a confirmation message. It is important to keep your hands in a horizontal position.
- **STEP 2 > SELECT THE VALLEY** > Lower your left or right hand to select the valley you want to explore, confirm your choice by lowering both handles.
- **STEP 3 > FLIGHT** > Use handles to fly: lower the left hand to turn left or lower the right hand to turn right. If you lower them simultaneously, you will go up a little. Release them both to go down.

### EVERYTHING IS READY!

Take to the air to explore the Vermenagna, Gesso and Stura valleys. You will land here in the town of Borgo San Dalmazzo. During the journey you can admire the area below you, discovering its natural beauty, villages and most curious sights. You will then have the possibility to retrace your own journey on the **points of interest map**.

Remember: it's a game! You can **collect points** crossing the energy gaps and entering the updrafts, but be careful to avoid the difficulties and obstacles along the way.

It will be a wonderful experience!

### GAME OVER / START AGAIN

Once your flight is over, you can go back to the beginning and **choose another route**.

If you want to interrupt your flight and **start again**, simply press the button on the front of the joypads hooked over the handles.
